ABSTRACT OF I. D. FINKEL'SHTEYN'S BOOK,
"SYMPOSIUM ON THE PRODUCTION OF CERAMIC INSULATORS"

The book contains information on Soviet and foreign production methods for magnesian, aluminum, and zirconium ceramic insulators, and gives details of the production of magnesian-silicate ceramics based on work carried out by the State Electroceramic Research Institute. It should not be considered a comprehensive guide to new types of insulators, but is of practical value because of the shortage of literature on production techniques for high-grade ceramics.
